

WE HAVE A "SPOOK"TACULAR WEEK AHEAD!

4th Grade Newsletter

October 22-26, 2018

New Life Academy of
Excellence
Where Educating is Our
Number One Goal

Reminder!

Reminders:

- Please make sure that your child is **picked up by 3:30** everyday.
- Please have your child **read for at least 30 minutes** every day!
- Pizza Hut Book has begun, so students can earn a free individualized pizza if they complete their reading log indicating that they have read for the entire month of October.

Early release days for parent teacher conferences are **October 24 and 25**. All classes will have lunch at 10:30 am. Carpool will begin at 11:30 am. All students must be picked up by 12 pm.

Please sign up for a parent teacher conference with your homeroom teacher via the email link sent.

WHAT'S GOING ON?

Thank you parents who shared your profession with us during Career Day last week! We appreciate you taking time out of your busy schedule to speak to us.

We'll Be So Busy!

Math - Students will continue to practice how to multiply with two-digit numbers using estimation, problem solving strategies, and area model.

Social Studies - Students will continue learning about the natural rights as found in the Declaration of Independence: right to life, liberty, and the pursuit of happiness. They will also learn about the three branches of government, checks and balances, and separation of power (local, state, and federal).

Language Arts - In reading, students will practice identifying the main ideas and details supporting the main idea. In grammar, students will continue to practice identifying proper nouns. In writing students will continue to work on their mini-magazine project to finalize their first draft of their paragraphs. They will plan out the text features they will use in their magazine, and create a five-question quiz based on the facts they provided in their informational paragraphs.

Science - Students will continue to learn about the properties of water. Students will learn that adding heat energy can cause ice to become water and water to become water vapor by increasing the temperature. Removing heat energy can cause water vapor to become water and water to become ice by decreasing the temperature.
